French Bring Down Three Enemy Aviators on the Verdun Front.

BY ATLANTIC CABLE AND A.P.

PARIS, April 2.—The Germans launched heavy attacks again today against the French positions both to the west and east of the Meuse. To the west the attacks were repulsed, but to the east, in the neighborhood of Fort Douaumont the assaulting forces were able to penetrate the Callette wood, lying to the south. From the northern part of the wood they were almost immediately ejected by French counter-attacks.

INSULTS NAME OF WASHINGTON.

TACOMA Man Held for Saying
First President was
Tipper.

(BY DIRECT WIRE—EXCLUSIVE DISPATCH)

TACOMA, April 2.—George Washington may be regarded as the father of all Americans. Superior Judge Card ruled here yesterday when he said that information against Paul R. Hafer might stand. Hafer is charged by Col. A. E. Job with having libeled George Washington when he wrote a letter to a newspaper in which he said that the first President was an exploiter of slaves, used profanity and liquor. Mr. Hafer's attorney contended that it was no more illogical to call Washington a tipper than it was to speak harshly of Adam for indiscretions he committed in the Garden of Eden. The court ruled adversely and set the trial for April 28.

operations, issued tonight by the War Department, reads:

"Between the Somme and the Oise our artillery was particularly active in the region of Parvillers, Foyeux and Lassigny, where the German trenches were shattered by our

Pride of Tokio Already Hurt; Wilson Expected to Veto Measure.

Classing of Nipponese with Inferior Races Certain to Add to Perplexing Foreign Questions President will be Called Upon to Settle—Congress may Override the Executive's Action.

BY JOHN CALIAN O'RAUGHLIN.

WASHINGTON BUREAU OF THE TIMES, April 2.—A new and serious foreign complication has developed for the United States as a result of the anti-Japanese provisions in the Burnett immigration bill, which was passed last week by the House of Representatives.

Viscount Chinda, the Japanese Ambassador, has called the attention of the Secretary of State to features of the bill which his government holds to be objectionable in that they lump the Japanese with inferior races and fail to accord to equality which Japan, by virtue of her position in the world, deems her due. It is expected the Ambassador will go directly to the President and submit to him a formal protest against the kind of discrimination which the measure, as enacted, would impose upon his nation.

The immigration question has been a source of irritation in the relations of the United States and Japan for many years. Our extension of the Japanese and our refusal to treat them exactly as we treat immigrants from white nations has wounded their national pride as nothing else possibly could do.

THE JAPANESE VIEW.
The attitude of the United States in the Japanese view, has served to

ZEPPELINS IN NEW RAIDS IN BRITAIN AND SCOTLAND.

Sixteen Persons are Killed and a Hundred Injured on British Northern Coast Saturday Night, While Casualties of the Scottish Visitation Last Night are as Yet Unknown. Damage to Property is Reported as Considerable.

(BY ATLANTIC CABLE AND A.P.)

LONDON, April 2.—At least sixteen persons were killed and about 100 others injured by the explosion of bombs dropped in another raid of Zeppelins over the northeast coast of England Saturday night.

The official version of the raid says: "Two airships approached the northeast coast Saturday night. Only one crossed the coast. The other turned back."

"For the present we know that sixteen persons were killed and about 100 injured."

A correspondent in a northeast coast town says a Zeppelin was sighted there at 10:30 p.m. Saturday night. It dropped fourteen explosive and seven incendiary bombs. Ten men, three women and three children were killed and twenty-five persons were seriously injured. In addition, about eighty others received minor injuries. A tram car inspector was killed and a woman tram conductor suffered the loss of a leg. Several houses were wrecked in one street. One house was demolished, but the family of five escaped without serious injury.

SCOTLAND RAIDED.

The coast of Scotland and the northern and southeastern coasts of England were attacked by Zeppelins Sunday night, according to an official announcement by the Secretary of War.

"Bombs were dropped at various places. No details are available."

"Eight dwelling houses were demolished and a serious fire was caused in a French polishing shop."

A correspondent in a northeast coast town says a Zeppelin was sighted there at 10:30 p.m. Saturday night. It dropped fourteen explosive and seven incendiary bombs. Swatow.

AMERICAN MARINES LAND ON THE CHINESE COAST.

(BY PACIFIC CABLE.)

PEKING, April 2.—Marines from the United States gunboat Williamson went ashore today at Swatow, where the Chinese troops have declared their independence of the central government. The detachment reconnoitered and found the city quiet. A Chinese gunboat also is anchored off Swatow, which is a seaport of Kwang Tung province, 120 miles south of Amoy.

President Yuan Shih Kai today issued a mandate, announcing that the State Council must continue acting as a legislative body until Parliament is reconstituted, in accordance with the provisional constitution of the Chinese Republic.

CHANG CHOW REBELS.
(BY PACIFIC CABLE.)

AMOT, April 2.—Chang Chow Fu, one of the largest cities of China, has declared its independence of the government of Yuan Shih Kai.

The officials at Amot have sent a request to the American consul asking that an American warship be sent to this port.

Chang Chow Fu is a city of about

GERMAN SUSPECT CONFESES TO NEW YORK POLICE.

Arraignment of Prisoner is Continued Until Other Persons, Declarer Involved in the Case, are Arrested—Teuton is Anxious to Avoid Being Sent to England.

(BY A.P. NIGHT WIRE.)

NEW YORK, April 2.—Important arrests are expected within forty-eight hours, the police announced today, in connection with the case of Clarence Reginald Hudson, also known as Ernest Schiller, the German spy, who, single-handed, captured the British steamer Matapoo at sea and cowed her crew of fifty-six men.

When Hudson was arraigned today on a charge of "suspicion of conspiring to dynamite the Cunard Liner" and to kidnap the German Ambassador, his attorney requested that his examination be deferred until tomorrow, explaining that important developments were expected almost immediately.

He himself from deportation to England and the possibility of being executed there as a spy. Hudson has "confessed" to planning explosions on many munition boats bound for ports of the Entente allies, the police say. He has repeatedly asked detectives to assure him he would be held in the United States.

According to the story told by Hudson, his efforts to cause the destruction of steamers were financed by a young man living in New York, Mass., who is a German sympathizer. He asserts he went to Salem after escaping from a training camp for the British army in England, where he was employed in a textile mill at the outbreak of the war.

Quiet.

MORMONS ARRIVE FROM WAR ZONE.

FIRST TRAIN IN A WEEK FROM SOUTH REACHES JUAREZ.

Passengers Say Mexicans Have Become Reconciled to Presence of American Troops, and Merchants are Freely Selling Goods to the Soldiers.

(BY A.P. NIGHT WIRE.)

EL PASO (Tex.) April 2.—The first train to arrive from the Casas Grandes region in a week pulled into Juarez today from Pearson, thirty miles south of the military base established by Gen. Pershing at Colonia Dublan. Several Mormon colonists were on the train, but they threw no light on the great mystery which has enveloped the organization of American troops since the decisive defeat of the Villistas last Wednesday by Col. Dodd. They reported that everything was quiet at Pearson and Casas Grandes, and that the Mexicans apparently became reconciled to the presence of the American troops on Mexican soil. Mexican merchants were well pleased, their colonists said, and were more interested in the American currency system than in the pursuit of Villa.

There is no indication here that there any anxiety over the supply problem for the troops at the front. No attempt has yet been made to ship food or forage by the Mexico Northern Railroad.

WILL BE CONFINED IN A STATION.

The Villa prisoners will be confined in a wire stockade, to be built on the military reservation here, it was learned tonight. The stockade will be similar to that erected at Fort Bliss in 1913 for the 5000 Mexican refugees who crossed the international line at El Paso when Villa attacked Juarez.

A United States postoffice will be established on Mexican soil for the convenience of the soldiers if the consent of the postal officials can be obtained. With the regular monthly pay day approaching and no means available to the soldiers in the field to send their money to their families, the military authorities have made a request for such an office.

CAPITAL AWAITING NEWS OF VILLA.

(BY A.P. NIGHT WIRE.)

WASHINGTON, April 2.—Sunday brought no news to the War Department about the hunt for Villa.

Secretary Baker was at his office most of today and well into the night, but he received nothing but routine telegrams from Gen. Funston. Hope for early capture of Villa still prevails in official quarters, but some of the seasoned army campaigners fear that failure to take him at Guerrero may result in a long chase.

Admiral Winslow, reporting to the Navy Department today on conditions along the West Mexican coast, said that, although the situation at present was quiet, there were signs of unrest among the natives, particularly in the vicinity of Guaymas and Topolobampo.

Investigations by commanders of naval vessels in Mexican waters, both on the East and West coasts, of reports that Felix Diaz is in Mexico heading a new revolution, have failed even to establish that Diaz is in the country. The reports tell only of unconfirmed rumors that Diaz is expected to begin a campaign against Carranza.

VILLA MAY HAVE ESCAPED AMERICAN TROOPS.

Pershing's Men Seem Unable to Locate the Elusive Mexican Bandit.

Belief is Increasing that the Punitive Expedition may Have been Deceived in the Direction Taken by the Outlaw Chief and Even Concerning His Injuries — Dogged Search for Him in Guerrero Mountains is Now On.

[BY A. P. NIGHT WIRE.]

AN ANTONIO (Tex.) April 2.—Unless Francisco Villa is definitely located within the next day or two, it is believed here that Gen. Pershing will begin a dogged search for him in the mountains west and south of Guerrero.

Since the defeat of Villa's forces on March 29, in and near Guerrero, Gen. Pershing has had lightly-equipped mobile detachments of cavalry sweeping in whirlwind fashion through the district about the headwaters of the Santa Maria River, in efforts to locate the elusive bandit who was reported to have gone in that direction after being desperately wounded.

INJURIES DOUBTED.

Gen. Pershing did not get a report through to Gen. Funston today. There is increasing belief that Gen. Pershing may have been deceived in regard to the direction taken by Villa and even concerning his injuries. Some reports indicate that he was not injured at all and instead of going northeast of Guerrero, he had moved into the hills to the south and east, a direction American officers had suggested him to take.

The new information is not regarded as more credible than that which caused the cordon of troops to be drawn across every exit from the

Warning.

HIGH PRICES IN MEXICO MUST STOP SAYS GONZALEZ.

[BY A. P. NIGHT WIRE.]

MEXICO CITY, April 2.—Gen. Pablo Gonzales, the military commander here, issued a warning tonight to the merchants of Mexico City and surrounding towns threatening punishment of the most severe and most exemplary form should they persist in maintaining the scale of high prices which has been effective during the past month. The warning is to be published in the press tomorrow and spread over the walls of the city in the form of circulars. The circular says:

"Since the first chief of the Constitutional army in charge of the executive power has pre-occupied himself with the situation which the people of Mexico face because of the excessive and unjust rise in the prices of first necessity, he has instructed and authorized me to act with the Minister of the Interior and the Governor of the

Aeronautics.

FLYERS TO COMPETE.

Four Californians will Enter the Contest for the Five Thousand Dollar Prize in Aviation Sweepstakes Offered by Curtiss.

[BY A. P. NIGHT WIRE.]

SAN DIEGO, April 2.—Four California aviators will compete in the 1916 national aeroplane sweepstakes for the Curtiss \$5000 marine flying trophy and \$1000 prize. The contest will start April 15 and end October 31. The grand prize money will be awarded the aviator covering the greatest distance in an over-water flight of ten consecutive hours.

The Californians who will enter the competition are: Brinley, instructor of the Signal Corps aviation school, North Island, who won the event last year; Raymond V. Morris, Curtiss instructor; Floyd Smith and Silas Christoffersen.

Verdun Battle.

(Continued from First Page.)

tion was very spirited throughout the day in the region of Douaumont and Vaux. The Germans, after a bombardment of extreme violence with shells of heavy caliber, directed four simultaneous attacks with effectives of more than one division on our positions between Fort Douaumont and the village of Vaux. Southeast of Fort Douaumont they penetrated Calliste wood but our counter-attacks, delivered immediately, drove them back in the northern part of the wood. South of Vaux our line runs along the immediate outskirts of the village. The last ruined houses of the village had been evacuated.

"In the Woëvre there had been intermittent artillery activity in the Bois le Prete. An aviator, brought down by our special guns, fell within the German lines.

"In the Vosges the fire of our batteries caused the explosion of ammunition depots east of Reich Ackerberg and Montaillou.

"Last night a bombing squadron dropped twenty-eight shells on the railway station at Etain and the bivouacs established in the outskirts of the village of Montaillou. The same number of aeroplanes were shot down.

"The Belgian aeroplane

"The Belgian artillery bombarded during the night the German positions at Mercken. Today there was violent aerial action in the sector east of Ramecapelle and in the direction of Dixmude."

Aeroplanes Now Successfully Used Against Invaders.

(Continued from First Page.)

BY ATLANTIC CABLE AND A. P.

LONDON, April 2.—With the exception of the big air raid of January 31, when the casualties were sixty-seven persons killed and 117 injured, the Zeppelin raids of Friday and Saturday nights caused greater loss of life than any previous serial attack.

A remarkable feature of the situation was the good nature in which the people were not surprised when the bombs or the damage done.

Inhabitants in the threatened districts early last night heard that Zeppelins were expected. The warning came from the bivouacs established in the outskirts of the village of Vaux. Southeast of Fort Douaumont they penetrated Calliste wood but our counter-attacks, delivered immediately, drove them back in the northern part of the wood. South of Vaux our line runs along the immediate outskirts of the village. The last ruined houses of the village had been evacuated.

Principle Involved.DEBTON.
RESPONDENCE.]Now. Socialistic parties have
upheld such views, but this is
first time they have claimed with
any success. We do not know
the present outlook is
agitation, as the war continues
the debt pile up, will grow in
height.The argument of the labor leaders
that the State should all men
military service to the State who
of military age who have no
such as necessary for war
are permitted to lead the
State at high interest
of which will cripple
any further. We do not know
the Socialists view about called
admit that a man has a right to
money he makes, but we do
not know that he has a right to
when a situation arises which
the sacrifice of one man's life
neighbor must be prepared to give,
in order to save 15 men. The
exception, let it be general con-
sideration, each man to give up what
has that the State needs."His argument is hard to combat,
those who hold it have
with which their arguments
met. The fact that in England,
more than in America, the
military classes are made up of men
helps the agitation. It is
that a tariff will help up
the price of manufactured
goods, and so put into
to put into war loans at interest
and that an income tax is insufficient
even if it takes every penny of
superfluous income of the rich.
use the cost of the war is so enormous
that it cannot be paid out of
national income. The following
statement says that if all
income above the cost of
war were taken by the State the
world would pay only one-quarter
of the cost of the war. There are rumors
if unfounded today may well
be tomorrow, that Lloyd George
at the proper time to attack
the question of the "conscription
of capital" party. If not he,
another.It is interesting to note that in
England it is now freely admitted
the empire cannot pay the interest
of our loans if the bonds are
not sold to him. Investors are
not subscribe to the pending
bond issue. If we lose all we do
not give up your money and
not to win."BOMBS DROPPED
BY ZEP RAIDERS.

BY ATLANTIC CABLE AND A. P. T.

NEW YORK, April 2.—It is stated that
a number of persons who were
in the Zeppelin raid were
unconscious by asphyxiation.
This is the first mention
of these bombs in air raids
in England. A person who visited a
portion of the raid said that
the raiders in a declaration that
it was never previously
met with such a camouflaged
attack. The raiders
flew in concert, attempted
to drop bombs during a greater
part of the night but were repelled
by a tornado of shells. For
a short time the evening
drew out to sea. The airship
escaped as the battle faded
from view. Of another small
civic, a deadly cannonade
met a raid. The raiders
claimed to have
several hits. It was
said the Zeppelin was
damaged. Its tail was seen to
be when it again regained
sea and turned northward
in the direction of the sea.

MONDAY MORNING.

WHAT A CADET
MUST UNDERGO.Some Course of Study is
Enforced at Academies.ARMED Warfare Demands a
Scientific Education.Now Oppose the Move to
Lower Requirements.

BY HARRY CARR.

WASHINGTON BUREAU OF THE
Tribune, March 28.—Army officers are
naturally alarmed at certain symp-
toms which indicate that Congress
is to lower the requirements de-
manded of boys who seek commissions
as naval officers.There is a feeling rather general in
that the examinations at West Point and Annapolis are too se-
vere, and that the mental test required
of an enlisted man who wishes to be-
come a commissioned officer is absurd.The agitation in Congress started
with the failure of eighty cadets at
West Point. It was discovered that,
after being asked to resign from the
army, nearly all of them were
offered important positions
with civilian concerns.The Senate committee hearings
on the bill, which was introduced by
the Senator from the United States
from Annapolis because he
did not keep up with the sever-
ity of the examinations at West Point.The substitute for any of the above.—
A portion of which he had
two portions of the test, the differ-
ence of interest, so that the two
portions produce equal returns. If the
first portion had been lent at the sec-
ond rate of interest, it would have produced
about one-half more interest than the
second portion. If the second
portion had been lent at the first rate of
interest, it would have produced
about one-half less interest than the
first portion.SUBSTITUTE FOR ANY OF THE ABOVE.—

PLANE GEOMETRY.

The following questions were used
at a recent examination:(1.) Theorem: The three medians
of a triangle meet in one point which
is at two-thirds the distance from
each vertex to the mid-
point of the opposite side.(2.) Theorem: If two triangles
have their three sides respectively
equal, the triangles are equal in all
respects.(3.) (a) How many circles can be
drawn tangent to three given straight
lines? (b) Problem: To draw a circle
through a given point and tangent
to two given straight lines.(4.) Theorem: If two parallel
right lines be divided into corre-
sponding parts, proportionate each to
each, and straight lines be drawn
through the corresponding points of
division, then the straight lines will pass
through a common point.(5.) Exercise: Find the locus of all
points, the sum of the squares of
the distances of any one of which
from three fixed points is equal to a
given square.

KIND MOSTLY USED.

All wood four-using industries
require a white or very light cream-
colored flour having good absorptive
powers. The wood species that may
be used are confined to the light, white,
broad-leaved woods, like poplar,
spruce, white pine and poplar are the
species most used. Mill waste, free
from bark, furnishes much of the
raw material for making wood flour.(6.) Exercise: Find the locus of all
points, the sum of the squares of
the distances of any one of which
from three fixed points is equal to a
given square.

EUROPEAN HISTORY.

The following questions indicate the
character of the examination in European
history (1452-1789):(1.) Describe the political condi-
tions during the latter half of the
sixteenth century in what is now Ger-
many.(2.) What countries were ruled by
Charles V of Spain at the height of
his power?(3.) Why was Luther summoned to
the Diet of Worms? What was
done at this Diet?(4.) Who was Melanchthon? What
was his importance?(5.) What was the Council of
Trent? Over how long a period did
its meetings extend? What were the
important acts of this Council?(6.) What ruler was instrumental
in separating England from Roman
Catholic influence? How was this
accomplished? Describe two
acts of Parliament important in this
connection.(7.) Outline the causes of Eliza-
beth's quarrel with Mary Queen of
Scots. State its political importance
and its results.(8.) What was the
Engineer Corps and the technical
branches of the service of the
student type are not to be
the best officers. He
notable example like Gen.
who was an unlettered man,
a man of one's own class. Great
military leaders of all time
there is so much to be said on both
of this question that I have gone
to question carefully. At my
the commandant of the
and the student type are not
to be the best officers. He

THE CITY
AND ENVIRONS.

EVENTS BRIEFLY TOLD.

North Plate Picnic.

A North Plate (Neb.) picnic will be held at Sycamore Grove Sunday. All former residents of North Plate are invited to attend.

To Appoint Delegate.

L. D. Sale, chairman of the Foreign Trade Committee of the Chamber of Commerce, is planning to appoint a delegate from this city to accompany the Latin-American return visit delegation on its proposed tour, leaving New York, the 15th inst. The number of the delegation will include Bolivia, Chile and Peru.

Republicans to Meet.

Mrs. Annie E. Krebs of San Francisco, nominee for delegate to the Republican National Convention, will be the guest of honor at the monthly meeting of the Woman's Republican League of Los Angeles, at Christopher's No. 551 South Broadway, Capt. D. Fredericks and Willis H. Booth, vice-president of the Security Trust and Savings Bank, will be the speakers. Mrs. Cornelius Cole will preside. A reception will precede the meeting.

Michigan Meeting.

An old-fashioned spelling bee will be a feature of a meeting of the Michigan Society of Los Angeles at 8 o'clock Thursday evening in The Times Assembly Rooms. John S. Miller, president of the Chamber of Commerce, will be the schoolmaster and the prize will be a bronze trophy cup. The judges will be Col. Frank H. True, president of the Federation of States Societies; George W. Prince, president of the Illinois State Society; Clarence D. Ladd, president of the Indiana State Society. There will be songs by Miss Mildred Bennett, Miss Josephine Sealeman, E. M. Bonnell and Master J. H. Bush, and a whistling solo by Miss Edna Burkhardt, accompanied by Miss Ethel Irwine.

Naive.

ITS TEMPO UNIQUE.

INTERESTING ACTING, JAPANESE IN "MAN OF FAITH."

By Henry Christeen Warnack.

When the geisha girls were at the Mason they were the real thing, but they did a poor business. "The Man of Faith" at the Gamut Club Friday night was also genuine as to cast, but was Anglicized in speech and plot, and the house would scarcely hold the business.

The play, founded on the life of Joseph Hardy Neeshima, a Japanese religious reformer, was written by Rev. M. Furuya and presented by the young men of the Japanese Congregational Church. Musical selections were played by the First Congregational Church orchestra, besides several quaint, special numbers.

The tempo of the play was unique and the acting naive. In some moments it was very good indeed. K. Ogawa, a Japanese, with a good favor and good English, and K. Mukayada played a drunken sailor in one act with zest and the mother of the hero in another act with remarkable ease and finish. His cleverness as the sage almost perverted. It is true in nature that this could have been other than grotesque, but it was really beautifully done.

A most remarkable characterization was that of S. Nitta as the Prince of India. It is true that a studied part can appear graceful, yet this ponderous Japanese was heroic in his dignity. One was compelled to admiration by his huge stateliness. M. Omura found himself acceptable in due roles.

As for "The Man of Faith" is interesting only for its good faith in following one man's career. In its Japanese aspect and taking into account its stage limitations as a regular drama, its treatment is effective and its appeal to an audience interested in foreign missions will always be strong.

PERSONALS.

Mr. and Mrs. Herman S. Cable of Rock Island, Ill., arrived at the Clark yesterday afternoon. Mr. Cable is a prominent banker of that Illinois city.

Col. V. M. Buckus, prominent mining man of Oatland, Mo., arrived at the Lankershim yesterday.

J. S. Loos, senior member of the Loos-Wiles Biscuit Company of Kansas City, Mo., is at the Alexandria.

Frank O. Long, proprietor of the Botsford Hotel of San Diego, arrived at the Lankershim yesterday afternoon for a short visit. He is accompanied by Mrs. Long.

DANCE HIS UNDOING.

Light Stepper Treads Maze of the
Many Times with Unknown
Beauty; Buckshot Directed
Through a Window May
Bring His Death.

Augustino Rodriguez danced often with a supple and graceful senorita at a dance at No. 1137 South Fickett street Saturday night, and today he lies dying in the County Hospital. The surgeons report he cannot survive injuries made by ten buckshot in his abdomen.

Rodriguez, who lives at No. 1079 South Fickett street, strolled into the dance hall and was charmed by the alluring stranger. Himself a good dancer, he found his affinity in Terpsichore when he took the unknown beauty into his arms and waltzed to the beat of a gay Spanish air.

The dance was waning, someone pushed the muzzle of a shotgun through the window of the dance hall and exploded the contents of the shells into Rodriguez's abdomen. He fell unconscious and was taken to the Receiving Hospital where Police Surgeons Wiley and Hiller operated on him. Later the victim was transferred to the County Hospital. He is a laborer, 35 years old.

He is in the care of Dr. W. E. Smith, 212-218 South Spring.

Santa Fe to Take Over the Line of the
Minkler Southern Railway Co.

Authority to lease its line to the Santa Fe has been given the Minkler Southern Railway Company by the State Rail Road Commission, it became known here yesterday. The line runs from Minkler, Fresno County, to Lindsay, Tulare county, with a branch from Cutler to the main line, and another branch to Woodlake, Tulare county.

The root of the Minkler Southern line was born entirely by the Santa Fe and it was constructed by a company composed entirely of Santa Fe officials with the intention of making it a part of that system. The expenditures in construction were \$1,341,848.

BUSINESS BREVITIES.

[Advertising.] Service! Service! Service! That is what you get in our boys' department. The men and women who serve you here are all experts and trained to care for you, boy or woman. And they are backed with a stock of merchandise which makes it easy for them to serve you well. Satisfaction always or your money back. Everything here the you can buy, whether it be for sport, dress or play. Harris & Frank, 437-448 South Spring street, near Fifth.

Dr. N. F. Hirtz, dentist, is now located in the Merritt Building, Broadway at Eighth, rooms 604-606, Merritt Street entrance. Phones Main 455, A-223, formerly in the Wilcox Building.

For quick action drop answers to Times "liners" in Times liner boxes in downtown office buildings. The location of the boxes are printed in the first column of the Times "liner" section.

Ask your dealer for Weaver's Roofing, or call Weaver Roof Co., 339-41 East Second Street, 2855, Bdw. 784. The Times Branch Office, No. 619 South Spring street. Advertisements and subscriptions taken.

The line runs from Minkler, Fresno County, to Lindsay, Tulare county, with a branch from Cutler to the main line, and another branch to Woodlake, Tulare county.

The root of the Minkler Southern line was born entirely by the Santa Fe and it was constructed by a company composed entirely of Santa Fe officials with the intention of making it a part of that system. The expenditures in construction were \$1,341,848.

— AUTHORIZES A LEASE.

Santa Fe to Take Over the Line of the

Minkler Southern Railway Co.

Authority to lease its line to the Santa Fe has been given the Minkler Southern Railway Company by the State Rail Road Commission, it became known here yesterday. The line runs from Minkler, Fresno County, to Lindsay, Tulare county, with a branch from Cutler to the main line, and another branch to Woodlake, Tulare county.

**PLAN SERVICES
ON CRESTMONT**

**Church Federation is Asked to
Indorse Easter Plans.**

**Motion-picture People Willing
to Join in Observance.**

**Electric Cross to Flame Out
Resurrection Message?**

Sunrise services for Easter on Crestmont, a slightly eminence just off Sunset boulevard, are now planned, and the Church Federation of Los Angeles will probably be asked to take full charge and conduct the affair for all religious denominations of the city, it became known yesterday. The crest of the hill has been offered by the owner for the services, and a committee is canvassing the situation to determine whether or not all interests can be brought together for the union service.

Since the success of the Mt. Rubidoux service near Riverside, sunrise Easter services have become popular throughout Southern California, many communities arranging this year to hold them on Sunday morning.

The matter has been agitated extensively in Los Angeles in the last month and has reached the point where there is sure to be some kind of a service on the high hill as several religious bodies are combining, including the Church Federation, Young Women's Christian Association, and the Southern California committee of the Motion-Picture Board of Trade.

The religious element of the picture industry, which has no open affiliations with any church or religious organization, is desirous of holding a service for the thousands of picture people in Los Angeles and vicinity, including all employees of picture theaters.

It has been proposed that interested persons in all the studios combine and erect a great cross and sepulcher on Crestmont and reenact the scene of the Resurrection. More in a strictly amateur spirit, without making use of the incident for commercial purposes.

SACRED SERVICE.

The Board of Trade committee, however, believes that to accomplish this without desecration it would have to be under the auspices of the Church Federation or some other religious body, and is subject to its approval.

Mr. Elliott J. Hole, of the Y.W.C.A., is planning to hold a day-light service with about 200 of the members of the association and decided upon Crestmont as the place to hold the service, but is desirous of making the affair as quiet and sacred as possible. When Mrs. Hole learned that the Church Federation is considering the matter, she decided to cast in the lot of the Y.W.C.A. with the Church Federation and will be in consultation in regard thereto.

Dr. William Horace Day investigated the plan for the church people, as he has been especially interested in the Mt. Rubidoux service. Dr. Day drove his car to the top of Crestmont and examined all features thereto and then reported to a committee of the Church Federation. This committee has been going into the matter thoroughly and testing the service of the pastors and laity and will make a formal report to the federation Tuesday.

The motion-picture people will accept an invitation to attend services if one is extended, but the matter is open and the Church Federation will conduct the service if it may be made that everybody is welcome to come.

If, however, the federation or a representative organization will conduct a service primarily for the thousands of picture people, the latter will enter heartily into the plans and endeavor to make a beautiful and noteworthy event of it.

SIGHTLY.

From the top of Crestmont may be seen Occidental, Eagle Rock Valley, Glendale, Tropico, a part of the San Fernando Valley, Griffith Park, Silver Lake, Hollywood and all the country to Santa Monica, more than half of the city, the ocean, the San Pedro hills, on clear day Catalina Island, and much of the country and mountain to the east.

A fifty-foot cross lighted with electricity placed on this hill could be seen over half of Southern California and far out to sea at night. The paved streets lead to the top with automatic parkings, while the Hollywood lines of cars run along the base, with the Temple street car three blocks away. It is believed thousands of persons would be convenient to attend the services. There is more than an acre of level ground on top, with gentle slopes for more room.

TELEGRAPHY.

BARS YIELD SECRETS.

Secrets told by the tapping on steel bars were laid bare to the police yesterday when J. W. Russell and C. H. Criton, arrested as alleged bumbo men, communicated with each other in the cells in the City Jail.

Jailor Shand heard the studied variety of taps from one of the cells quickly responded to from the other cell. An ex-convict, now in jail on a minor charge, recognized the patter and smiled knowingly when he saw Jailor Shand with his ear to the thrashing metal.

"I am here from home, to me," he explained to the jailor.

Forsooth the interpretation began, and the entire dialogue was recorded for the benefit of the detectives. What was said is a matter the police are withholding until further developments in the case.

One of the secrets exposed was to the effect, two other men were involved in the alleged attempt to bungo W. Miller of Springfield, O., in the transfer of some mining property. Detective Burgess and Cowan took in charge the \$14,500 involved and returned it to Mr. Miller.

TO TEAR UP TRACK.

Copies of an order of the State Railroad Commission, granting permission to the Pacific Electric to tear up 1,601 feet of track on Euclid avenue, Ontario, were received here yesterday.

**Crash.
JAMMED BY SPEEDER.**

Wealthy Contractor's Car Run Down by Motorist, Who is Sought by the Police; Victim's Wife and Child Hurt; Former in Serious Shape.

A blue roadster, bolting at high speed, according to the police report, rammed an automobile driven by James Cockburn, a wealthy Chicago contractor of No. 85 North Raymond avenue, Pasadena, yesterday afternoon, causing serious injuries. The accident occurred at Ninth and Flower streets.

Mr. Cockburn, accompanied by Mr. Cockburn and his 15-year-old daughter, Dorothy, was driving south on Flower street, when the unknown driver of the roadster carelessly went on Ninth. Before the wealthy tourist could turn his machine the crash ensued.

Mrs. Bertha Cockburn, the wife, was thrown from the machine. Her ribs were crushed, her head cut and her right arm torn. She is in a serious condition. Miss Cockburn's right ankle was sprained and her arm injured. Mr. Cockburn received minor abrasions.

The police are searching for the pilot of the speeding roadster. Witnesses to the accident confirmed the report given by Mr. Cockburn.

Has resided here since November and is an annual visitor.

**Restaurant Owner Falls to Drag
Wife into Suicide Fact, But Drains
Dose Meant to Slay Bugs; Arms
Against Rescuers—Glad He'll
Recover.**

The first of the Campbell clan of Scotland who in the history of the Receiving Hospital had attempted to take his life, did so yesterday with details so exciting they nearly furnished a triple tragedy.

W. A. Campbell, manager of a small restaurant at Ninth and Mateo streets, became despondent recently because of business conditions. His melancholy reached such an advanced stage yesterday he induced his wife to enter into a suicide pact, whereby they were to end their lives together by taking an offensive but potent poison.

WITHOUT PREJUDICE.

This application states that the question of whether the California Development Company was a public utility and subject to the commission's jurisdiction, and whether the Southern Pacific as purchaser of the development company's properties also by the public utility matters not as determined by the courts, and the application is made without prejudice to any legal rights of the applicant.

The ratification of the agreement by the commission is desired, regardless of the question of jurisdiction that no question may be made as to the validity of the agreement because of failure to obtain the commission's approval.

Under the agreement filed with the application the Southern Pacific took the property sold under foreclosure sale, for \$175,000, this amount covering the sum due on the bonds of the development company.

The judgment of the Southern Pacific against the Development company obtained in 1909, for \$1,501,903, with interest, the judgment of the new Laramie Salt Company obtained in 1908 against the Southern Pacific for \$453,246 with interest, and other small sums.

The Southern Pacific agreed that

they should be credited against its

the amount due on all bonds of the development company, and all the development's certificates owned by it.

The judgment of the Southern Pacific Company, and the judgment of the salt company, which has been assigned to the Southern Pacific.

The Southern Pacific and the irrigation district agreed to convey to the irrigation district the property constituting part of the canal system of the development company, in Imperial county, and for this the Southern Pacific was to have \$3,000,000 in bonds of the district, with interest at 5 per cent.

NOT VALID!

The bonds were placed in escrow with the Los Angeles Trust & Savings Bank as trustees while their validity was ascertained and pronounced upon by Charles P. Ells, whose opinion is conclusive upon both parties.

It is understood that the bonds will have to be re-engraved at considerable cost.

The reason for this is that Mr. Ells found a slight error or contradiction in the order passed by the directors of the Imperial Irrigation District.

That invalidates all the bonds, according to the expert.

The irrigation district has agreed to secure a certificate from the State Comptroller that the bonds are legal investment for trust funds and so forth.

The Southern Pacific agreed that

the district should have the right to draw

any excess waters over the railroad's lands submerged by the Salton Sea, within certain limits, and also over the lands of the New Liverpool Salt Company, under the same sea.

No lands in Mexico figure in the

agreement except such as are

needed for right-of-way for canals, or

for the convenient operation of the irrigation system, including

warehouses, property, lands, etc., in Mexico.

Another application filed by the

Southern Pacific and Co. Holabird,

as Commissioner of the Southern

Pacific, and the New Liverpool Salt Com-

pany, asks for approval of the trans-

fer of the properties of the California

Development Company to the South-

ern Pacific and of an agreement be-

tween the Southern Pacific and the

New Liverpool Salt Company, relative

to their respective interests in the

properties.

This agreement with the salt company was that in case of the

sale to the district of the properties

in Imperial county, the Southern

Pacific and the salt company will be

the owners of all the property conveyed

to the railroad and one-fifth to the

salt company.

Unable to furnish the \$50 bail set

for his release, Wilson is in jail.

He says he is not sorry for having

written vitriolic things about Mr. Bow-

man.

The money involved in the dispute

that resulted in the criminal prosecu-

tion of Mr. Wilson was \$54, wages al-

leged to be due him when he worked for

**FINAL CHAPTER
TO BE WRITTEN.**

**Railroad Commission Asked to
Validate Twin Agreement.**

**Imperial Water System to Pass
to Public Ownership.**

**Irrigation District Bonds may
Have to be Re-engraved.**

The last chapter in the interesting and at times exciting history of the California Development Company will be written Friday, when President Thelen of the State Railroad Commission will hear applications here for approval of agreements whereby the great water system of Imperial Valley passes from private to public ownership.

The agreements for which approval is sought are, one between the Southern Pacific and Col. W. H. Holabird and others for the sale of the property of the California Development Company, and another between the Southern Pacific and the Imperial Irrigation District, under which the irrigation system formerly owned by the California Development Company is sold to the district for \$3,000,000.

The Southern Pacific bought, February 8, at a foreclosure sale of the properties of the California Development Company, the canal system of the company in Imperial county, together with other property, and the

Imperial Irrigation District has recently authorized the issuance of \$3,000,000 of its bonds and \$3,000,000 of this sum was awarded on

February 8, to the Southern Pacific,

which bid the sum of \$1,750,000,

thus covering the sum due on the

bonds of the development company.

The irrigation system features open-order drill, setting up arm-

aces, camp sanitation, first aid, company

administration, minor tactical

problems, gallery practice with the

SUNDAY MORNING.

RELIGION

Services Yesterday.

THE PREACHERS.

INTO THE HIGHWAYS AND
HEDGES SEEKING SINNERS.

By the Faithful Reporter.

Two strong sermons were preached yesterday on the spirit of religion. Though religion gave them their food and religion was their for a little waiting, they went well. How happy the man who waited! Home and love with the blessing of God were all around him. Just for a moment, however, the character is the choice between the better and the best. How often destiny is the choice between the better and the best.

"It is a sad and bitter thing that irreligion is often a habit, and hard to break. For long years these lepers had kept their distance. To stand afar off was of their life. It is no wonder that they wanted to be home in church. The theater, the saloon, the club, the lodge, the loafing corner, the dance hall, the crush of business in the library, the bustle of the office, their work. And God's great, good heaven is soon to be their home, they confidently think. With no habit of prayer and praise upon them they are very early to pray and praise forever. How much they will have to learn!"

REYNOLD E. BLIGHT.
CHURCH OF THE PEOPLE.

MANY MINISTERS ARE RESPONSIBLE FOR THE LOSS OF FAITH TAKEN IN CHURCHES.

"Why Men Do Not Go to Church" was the subject of a pulpiteer by Reynold E. Blight at the Church of the People yesterday morning. He said: "The very fact that a go-to-church Sunday is evidence that the majority of people do not make church-going a consistent practice. Especially do ministers complain because comparatively few men go to church with any degree of regularity."

The idea of a self-imparting, self-revealing, self-thinking God is the soul of the message of the prophets and the gospel of the apostles. God was in Christ seeking man. The kindness and love of God are exemplified in Him. In fact, the kindness and love of God is one of the finest designations of Jesus. He went among men to show them the Father, and to teach them rightly to decide the question of the meaning of existence.

"No more practical question can be put to an individual than this: Have you saving faith in the Lord Jesus Christ? For saving faith is the hand of the human personality reaching up and touching the divine. Very well. Have you such faith? Is it an energizing life-exalting reality within you?"

"One of our great modern scientists, who has a decided bent for religion, asks the question: 'How can the general level of society be raised?'" And he answers: "They must themselves proceed tentatively and experimentally to put their ideas into action, to bring them to the best of experience." Quite right, scientist friend! Christians always insist upon just that personal self-commitment to God and the righteousness He requires.

"Remember that the true Christian church is society. Those who are personally acquainted with the love of God, and are united for divine worship, Christian character building, and ongoing evangelism. God was in Christ. God is in His church inviting you to it to take part and to make use to make you more worthy of your heavenly Father, and more valuable to your fellow-men. The church invites you to the blessings of salvation, and spiritual or social propaganda. The preacher who in sincerity and earnestness proclaims the healing, saving, uplifting truth of God, in which men may find comfort, reproof and guidance, will not lack appreciative audiences every Sunday in the year."

DR. DAY.
FIRST CONGREGATIONAL.

TRANSCENDENT, IMMINENT AND FATHOMLESS: THE THREE MODERN CHRISTIAN THOUGHT OF GOD.

Dr. William Horace Day, pastor of the First Congregational Church, preached yesterday on "The God of the Christian." He said: "The steady growth of religious influence indicates that the religious process goes on without disastrous interruption. While our population, in a recent decade increased 25 per cent, the growth in membership of the local Protestant churches was 42 per cent. The total membership of Nazarene are more and more reverenced in all organizations of men, and the humanitarian institutions are steadily increasing, and large fortunes are being expended to endow philanthropic enterprises."

"There is increasing high valuation placed upon human life. The human being, man or child, cannot be found bound in a park or alley without setting in operation all the municipal machinery to apprehend the perpetrators of the foul deed. This is leading to a careful study of all the baleful influences which are at work, such as poverty, sanitation, amusements, and the like, and will result finally in the certain elimination of those things which endanger health and destroy physical vigor."

"There is an incoming tide of religious faith. Negotiations are wearisome and uninteresting. Man is not saying, 'I do not believe,' and rarely, but he is reverently asking, 'What can I believe?'" Men are not pluming themselves on their agnosticism, but are humbling themselves before the throne of God. Those who contributed most to the advancement of science in the past years was that noble Earl of Shrewsbury, who, though spared to a ripe age, yet with his last breath said, "How can I bear to leave the world so full of misery? Since only during the existence of the Roman Republic was the nation at rest from war. The day is coming when the portals of the temple of Janus shall be closed forever, sealed by the eleventh commandment and bolted with the Golden Gate."

"God's in His heaven."

"All's right with the world."

"As the new century opens the battle is waging with fury. The devil seeks to hold his citadels of power, but the line of battle is moving slowly but surely forward. Some hilltops are ours today which but a little while ago were held by the enemy. Forward, soldiers of Christ! Our Captain leads the way! Truth might. Life always may prevail! The right shall at length prevail! The mesh shall inherit the earth! 'Shout for the Lord hath given unto you the city!'"

DR. EBY.
FIRST U. B. CHURCH.

EVERYTHING IS ALLOWED TO
PREDICT THE TRUTH IN WE WILL
USE TACT AND COMMON SENSE.

Rev. W. L. Y. Davis, pastor of the West Adams M. E. Church, preached yesterday on the subject "From the Eyes Up." He said, in part:

"Scrambled brains are not a necessity; they are an acquisition. If you see a monkey just like you, who's to blame?"

"When I speak of eyebrows, I do not mean highbrows. There is a difference. The man who is a fool over a little knowledge is a fool of a kind with the man who is Pharisee over a little bit of religion."

"The highbrow is a man who takes up all the time you can see in. All of which is a pretty fair sign to me. He has just gotten his feet wet in the brink of the vast ocean of truth, but has never been in over his head. If he could not touch bottom, he would not be so cock-sure."

"The really cultured man is always modest; he knows how little any one man can know. And the really good man is humble; he knows how hard it is to do well."

"It is not strange that it took the severest persecution to bring the first century church to the recognition of the universal responsibility for evangelism, that was evidently laid upon every disciple however humble from the day of Pentecost?" They had not been well contented to things so as on a pedestal. A goodly number of their friends had espoused the cause of the late Nazarene and they evidently would never have attempted the work of world evangelism if Saint Peter had not followed them and convinced them to cast them and arrest them and have them cast into prison that they might eventually suffer the same fate as Stephen. It took the awful suffering of those years to drive the church to the fulfillment of the great com-

mission by their Lord before His ascension.

"There seems not to have been any distinction as to who was to preach the gospel. This was evidently a premium put upon lay evangelism. We are told that the apostles remained in Jerusalem at least for a time. So the class that went everywhere was the officials of the church, not those who had been dained to the ministry, but the lay people. The religion of Jesus Christ will not become world wide in its influence and saving grace until the gospel comes from the least to the greatest, becomes democratic, and goes wherever their lots may be cast. That is a fundamental principle of Christian evangelism. Our biggest task now is to get our lay people into the frame of mind which will enable us to do His work, how should His spirit be communicated to the world? This is done only by through a company of Christian disciples who are filled with the power of the Holy Spirit, and have the spirit of these great prophets of Israel largely passed into them. The Lord of Hosts started a fire of evangelism that did not stop in its running until the whole world then known to men was lighted by its glow. No part of this civilized world was without the influence of Christ Jesus. What lingers we have in our time as the successors of such as these."

"When we leave this church today we go everywhere preaching the truth? The street, the home, the school, the office, every place is an appropriate place to preach the truth if done with tact and common sense. Why should not the consuming topic of conversation in Los Angeles for the next three weeks at least be religion instead of the climate or business?"

REV. J. E. ENMAN.

LAST CONGREGATIONAL.

TRUE CHRISTIAN CHURCH IS A SOCIETY OF PERSONS PERSONALLY ACQUAINTED WITH THE LIVING GOD.

Yesterday morning, in the East Congregational Church, the pastor, Rev. James E. Enman, preached on "Self-expression from the Church," taking his text from the words of Jesus, "Whosoever doth not bear his cross and come after Me, cannot be My disciple," Luke xii: 37. He said in part:

"When the curtain was first lifted on the stage of human life man was seen trying to hide himself, to excuse himself from his Maker, and God was not known to him as a man. The Lord's question, 'Where art thou?' means, what is your attitude of mind, of will, and of life toward Me and the cause for which I stand? I have a right to know, child, and you cannot tell me or beguile yourself. You must decide for or against Me and the life I offer you.'

The idea of a self-imparting, self-revealing, self-thinking God is the soul of the message of the prophets and the gospel of the apostles. God was in Christ seeking man. The kindness and love of God are exemplified in Him. In fact, the kindness and love of God is one of the finest designations of Jesus. He went among men to show them the Father, and to teach them rightly to decide the question of the meaning of existence.

"No more practical question can be put to an individual than this: Have you saving faith in the Lord Jesus Christ? For saving faith is the hand of the human personality reaching up and touching the divine. Very well. Have you such faith? Is it an energizing life-exalting reality within you?"

"One of our great modern scientists, who has a decided bent for religion, asks the question: 'How can the general level of society be raised?'"

Rev. Charles C. Selecman chose for his subject Sunday evening, at Trinity Auditorium, "Fools." He said in part:

"'Harsh as this may seem, the scriptures are full of references to the foolishness of man. The world abounds with warnings against folly and foolishness, as well as with exhortations to be wise. Jesus likened individuals who failed to make proper provision for their temporal welfare to a foolish man."

The Psalmist declares that the atheist is a fool. He is in God's world, but he has lost the sense of the infinite. He has regard for the building but not for the builder, nor for the builder.

He would explain Beebe's symphony by eliminating all reference to the great master. The practical atheist is as truly a foolish man as the theoretical atheist, and there are thousands of people today, living as if there were no God, no Bible, and no future.

"Jesus had something to say about the rich fool. This man had no more reason to believe that his money could buy salvation than a fool could buy salvation. The rich fool, who is a fool, is in God's world, but he has lost the sense of the infinite. He would explain Beebe's symphony by eliminating all reference to the great master. The practical atheist is as truly a foolish man as the theoretical atheist, and there are thousands of people today, living as if there were no God, no Bible, and no future."

KILL OUT VAIN AMBITION.
No doubt the army will be ready to return from Mexico the moment the main offenders have been wiped out; but it might be as well while our soldiers are down there to discourage any other persons from desiring to assume command of what forces Villa may have left behind him.

SAFE FUTURES.
Experts say that walnut trees in California are young when they are 62 years of age. This is encouraging. No man need be afraid of outliving his investment if he goes into a walnut grove. By the way, down at Huntington Park there is an enterprise which makes a fine sauce from green walnuts and also makes pickled walnuts after the English fashion.

LOOKING FORWARD.
San Diego has won by a court decision the right to build a great dam for its water system. The sons of men are indeed wise in their generation when they conserve the waters of the hills. After a while, when the millions are in Los Angeles and around it and when the tens of millions are scattered through this Southland of incalculable riches, the cry of the millions will be for water. Now is the time to lay broad plans against that day of great want.

SEEKING BLUE TIGERS.
Mr. and Mrs. Roy C. Andrews are about to depart for Central Asia in quest of a blue tiger, in company with Edmund Heller, who was with the big Bull Moose on his African game hunt.

If the discoverer of the lost river could be persuaded to join the party, and if the men who climbed the north pole and sailed the American flag to its summit could be added thereto, the blue tigers of Tibet who were unwilling to contribute to the attractions of an American zoo would need to seek the innermost recesses of Asiatic jungles.

MORE FRIGHTFULNESS.
The Danish Merchant Guild has just convicted a cocoa firm for selling the German government several tons of a substance called cocoa, but which proved to be mainly ashes, rancid fat and sand.

We have all heard of the manufacturers who supplied brown-paper boots for the British soldiers in the Boer war, and those that sent hundreds of tons of putrid canned meat for the sustenance of the armies. This form of frightfulness seems popular among noncombatants and should be considered in the accounts when noncombatants find themselves the victims of war horrors.

NEW SYSTEM OF PROTECTION.
Great Britain has, by order of council, formulated a system of protection as ample as it is sufficient. It consists not of imposing high duties on imports, but of embarking altogether the importation of commodities that may be manufactured in Great Britain.

The embargoed list consists of almost everything to eat, drink or wear. By some strange and inexcusable neglect the importation of hairpins and dog collars has not been embargoed.

What Great Britain will not herself import she will not permit Germany or Austria to import, and she has published a list of 216 articles that she declares to be contraband of war and sixty-eight articles which she declares to be conditional contraband.

BANDS FROM THE BURNING.
A young dentist in the East is perfectly willing to plead guilty to murder, but his attorneys are putting up an insanity defense. Thaw was guilty of murder, but his insanity plea saved him from the electric chair. A great deal of time and money is spent in cases of this sort where the life of a man who is saved is pretty well blighted. On the other hand, there are many cases where chronic alcoholics might be saved from the penitentiary through treatment as inebriates and returned as useful members of society. No wage-earner of any capacity ought to be locked up at the expense of the State if he has a chance and a genuine disposition to make good, and no family ought to suffer the stigma of having its head in prison when any other measure will fully answer the requirements of society.

BRITAIN HAS MADE NO PEACE OFFER.

Speaking at the Lord Mayor's banquet in London in November, 1914, Premier Asquith declared that the sword of the United Kingdom would never be sheathed until Belgium had recovered more than she had sacrificed; until France had been adequately protected against all menace; until the rights and independence of small nations had been placed on unassassable foundations, and until Prussian military domination had been finally destroyed.

Since then millions of lives and billions of dollars have been expended in the great war and thus far neither belligerent has made a decisive success.

But the speech of Mr. Asquith made sixteen months ago still forms the basis of the allies towards any proposals of peace, and it is stated in both the London and Paris journals that any reports or rumors or hints at concessions of any nature which may find their way into the press, which in any particular controvert the declarations made in November, 1914, by Premier Asquith, may be regarded as inspired for political ends, no matter from what sources they may come.

PILLING THE MILK.

In *ta-ra-boom-de-a* days a saying much in vogue was that a policeman's life is not a happy one. The same phrase may be applied to milkmen. Because of the uncomfortable hours they have to work and because of other trying factors connected with their industry dairymen command one's sympathy when they are peacefully performing their duties. But when they go on a strike and accompany that strike with violence and other acts of lawlessness they are deserving of as much censure as applies to men in other occupations who adopt similar tactics because they are not satisfied with the price they obtain for their labor or their produce.

A strike of milkmen is rather an oddity, even in a period when anybody seems to strike for anything. Farmers and dairymen of Northern Illinois have introduced their novelty in labor troubles, but have not won anything by it because they have accompanied it with unlawful acts and deeds. These at the outset place them "outside the pale," so to speak.

The strike followed the refusal by the big Chicago distributing companies to increase by 22 cents a hundred pounds the price paid for milk. Into the merits of the controversy one does not need to go. The strikers have put themselves in the wrong at the outset by adopting tactics borrowed from labor unions. The farmers and dairymen who are fighting the Chicago companies have posted pickets at many of the plants and at cross-roads leading to them. That is contrary to the law. They have overturned wagons and dumped the milk in the roads. That is not only wasteful, but criminal. They have attacked and maltreated an officer of the court and otherwise behaved like ruffians.

THE ACTIONS OF THE FARMERS AND DAIRYMEN indicated that they started this strike maliciously and without any consideration for the general public and for the hundreds of thousands of people who depend upon the great distributing companies of Chicago for the delivery to them of milk. It also is evident that the strikers determined to start out with violent methods. A matter of this kind, in which so many people outside of the actual disputants are concerned, is essentially one for peaceful settlement. No one denies the right of the farmers to demand a higher price for their produce. That is a matter for private settlement between themselves and those to whom they sell, but they appear entirely to have lost sight of the fact that the public also is a vitally interested party. The public pays both the companies and the farmers and the public deserves consideration at the hands of both.

Mark, then, the difference between the two parties to the milk-prize fight. The farmers don't care whether the public gets any milk or not; in fact, they are destroying milk in order to prevent it getting to the consumers, and they are preventing other farmers who do not agree with their views from delivering to the distributors. Contrast that policy with the course of action pursued by the companies. They are straining every nerve to see that the public is supplied with milk. They announce that they will continue to do everything in their power to meet the needs of the Chicago retail trade just as if there were no strike. They will protect the householders to the fullest possible extent.

Of course, the hand of the labor-union agitator is seen in all this. In fact, to change the form of expression, his clever foot is in the milk. The dispatches from Chicago say an effort is being made to affiliate the Milk Producers' Association with the Chicago Federation of Labor through the Milk Drivers' Union. Strike make strange bedfellows. How ludicrous it seems to have free and independent farmers consorting with the beauties who control many labor federations! It will not be surprising to hear of the quick collapse of this milk strike. Unwillingly born, with ruffians for wet nurses, it is doomed to an early end, and in their cooler moments the farmers undoubtedly will wonder what caused them to make such arrant asses of themselves.

EUROPEAN DEFIAE OF INTERNATIONAL LAW.

The Columbia Alumni News publishes an address by John Bassett Moore on "American Contributions to International Law," delivered recently before the Baltimore Alumni Club. If Mr. Moore would also give an address on German and British evasion and defiance of international law he would contribute to the enlightenment of the State Department, of which he was at one time a counselor.

Mr. Moore regards Benjamin Franklin as the leading diplomat of his day. His great knowledge of men, his liberal political and economic views and his worldwide fame as a philosopher entitled him to a foremost place. John Adams ranked next to Franklin, and Thomas Jefferson completed the trio of statesmen who, at the close of the eighteenth and the beginning of the nineteenth centuries, established our relations with European nations.

The United States has rigidly observed the requirements of international law. In 1793 the French Minister, Genet, landed at Charleston, S. C., and proceeded to fit out and commission vessels to prey on British commerce. The British Minister complained of these acts, and in response Jefferson, as Secretary of State, admitted that it was the duty of the United States to prevent envoys within its territory as well as the fitting out of vessels for either belligerent; and for any failure in these particulars he admitted that the neutral government was obliged to make compensation.

This principle was recognized and acted upon by Great Britain in the settlement of the Alabama claims.

Before the Civil War, in 1855, the Senate of the United States resolved:

"American vessels on high seas in time of peace bearing the American flag remain under the jurisdiction of the country to which they belong, and therefore any violation, molestation or detention of such vessel by force, or by the exhibition of force, on the part of a foreign power is in derogation of the sovereignty of the United States."

Great Britain accepted this doctrine and in time it came to be thoroughly established as a part of international law.

"American statesmen of the past and present generation," says Mr. Moore, "believed in law as the true basis of justice and freedom. They believed in international law as the great security of rational

"Now Let's See Ye Fly."

[New York Sun.]

RIGHTS AND INTERESTS: and so believing, they felt that they rendered the greatest possible service to the world in respecting the limitations of the law and in living up to its standards."

Great Britain has, under the plea of necessity, disregarded her specific treaty obligations with us as well as the elementary principles of international law. She seized merchant ships registered as American, flying the American flag and owned by an American corporation, on the ground that many of the stockholders of the corporation were Germans. Even if this had been true—and the records exhibited show that it was not true—the seizure was in violation of her treaty obligations with this country and with the principle of international law which exempts private property from belligerent action.

Ironically, therefore, they have contented themselves with recommending that members of Parliament shall forgo the salaries they voted themselves when the present administration came into power, and that pensioners serving with the colors should not draw both pay and pensions.

This has made the Retrenchment Commission highly unpopular with the M.P.'s and pensioners, and any other recommendations they may feel called upon to make will doubtless promptly be voted down.

Appointment to a retrenchment commission is about the most thankless task that can be put upon one for their sins. Think what a bowling time a retrenchment commission appointed by Gov. Johnson for California would have! And if they dared to discover that retrenchment was most urgently needed in the Legislature itself, that numerous sinecures should forthwith be abolished, and that no one should draw two salaries—voila, they would deserve all they got! The first duty of a retrenchment commission is discriminating with good taste.

RIPPLING RHYMES.
PAYING BILLS.

There's nothing more pleasant than paying your bills, than paying your bills at the time when they're due; it sends through your heart most enjoyable thrills to know that there's nothing charged up against you. You're making the wheels of your village go round, you're giving the workers the best kind of aid when you dig from your wallet the shilling and pound and pay up your bills in the palace of trade. You're filling the soul of the merchant with glee, you're bidding the banker to weep never more, you're hanging new wreaths on your family tree, when you pay up your bills at the dumpy store. That man is a hindrance and hurt to his town, a brakeman on the wheels of his own neighborhood, who views the collector with withering frown, who doesn't pay up when the paying is good.

—WALT MASON.

Globe Sights.

[Aitchison Globe:] To a man, tattling seems about as foolish as the word tattling sounds.

When a town man thinks of being a farmer, he thinks of being a prosperous farmer.

If there were an elimination contest in town, would you figure in the finals?

Speaking of modern conveniences there are also a number of modern inconveniences.

Memory is so short that the closing argument is something of an advantage to the side which gets it.

More men learn a lot about preparedness when his wife's preacher is invited to the house for dinner.

A lawyer always finds it difficult to say anything without demonstrating his wide and range vocabulary.

Talk about that fury of a woman scorned: ever hear a man talk about the man who succeeded where he failed?

Fault of the Moon.

[Indianapolis News:] The partial eclipse of the sun was the subject of conversation in the little grocery store, where a number of villagers sat about the stove awaiting the early bedtime.

A man happened to be present who was well versed in the subject under discussion, and he was asked to explain the curious phenomenon of an eclipse. He pointed out that the moon simply came between the earth and the sun and blotted out from view a part of the sun's surface.

"Wal," remarked an old veteran, as he unburred his mouth of a deluge of tobacco juice, "it sure is a pity the moon wasn't full, 'cause then we'd had a total eclipse."

—Let off Easy.

[Richmond Times-Dispatch:] "You had your first patient today?" asked the old sawbones.

"Yes, daddy," replied his son.

"What was the diagnosis?"

" Didn't make any."

" Didn't you feel of her pulse?"

"No; she wore a wrist watch, and I couldn't get at it."

" Didn't you look at her tongue?"

"No; she was using it."

HALF-BAKED CULTURE AND "FREE VERSE."

[CONTRIBUTED TO THE TIMES.]
BY HON. WILLIAM DUDLEY FOULKE.
Author of "Some Love Songs of Petrarch,"
"Masterpieces of the Masters of Fiction," "History of the Langobards," etc.

THERE is a great deal of silly talk that goes the rounds in society as well as in our newspapers and magazines about "new" art—the new music—the new painting—the new literature—whether these take the form of extravagant orchestration, "futurist" pictures or of "modern" verse, something esteemed quite different from the poetry of the past, more unconstrained, more graphic, more real, the dawning of a new era, etc., etc.

I suppose it has always been so. Every new year must have its novelties, and fashion is strong, whether it be in bonnets or in versification. The people follow like a drove of sheep when the pace has once been set and the direction given, and they seem to believe in each case that the one right thing has at last been found after long ages of floundering and error. Beethoven is relegated to the shades while Richard Strauss monopolizes the footlights; cubism is angry of a noble future for painting in which Raphael shall be finally forgotten, and now we have realms of half-ridiculed culture, "free verse" without rhyme or meter in which most of that called poetry is written.

It is finally admitted now, after all, that the job of telephone is a calling.

It might have been a marked man that torpedoed the latest victim of marine warfare.

Some day international diplomacy may refer to aeroplane raids as violations of blue-sky law.

A Kansas woman wants to be President of the United States. She is looking for a long rest.

There is a local plumber who is a poet. Not every poet has such a active side line, however.

The Russians are trying to buy the ship Tango from the Japanese to lead their war dance.

Always look out for the man who wants to do you a favor. It is you who watch him with both eyes.

Secretary Daniels says the navy has 300 aviators. Well, Josephus is one—he is always up in the air.

Speaking of a substitute for gas, much discussion is in the papers, we the matter with a street car ticket!

Whenever you hear a fellow who is up doing all the talking it is a guess that he has but very little to say.

The Democrats do not seem to be about dark horses for President.

There is always the donkey in that place.

An investigator of the recent Young (O.) strike says it was participated in many races. But he neglects to say won.

Naval officers are not allowed to tell them what they know about the navy, but Daniels insists upon telling what he does not know.

If one cares to note the different between demagoguery and statesmanship a portion of the speeches in Congress affords opportunity.

Gasoline is so high that the gas stations have all of the earmarks of plutocrats.

Don't worry about your faults. There plenty who will point them out to you. It is not necessary that you should be to locate them.

An up-state man finally shot himself after contemplating suicide for more than ten years. How is that for waiting?

Naval officers are not allowed to tell them what they know about the navy, but Daniels insists upon telling what he does not know.

If one cares to note the different between demagoguery and statesmanship a portion of the speeches in Congress affords opportunity.

DOINGS IN THE SPOTLIGHT AND
CAMERA REALM.

By Grace Kingsley.

The Los Angeles Times Animated Weekly appears to be scooping up the best of the big public events which are of interest. The Universal photographers are an unusually brisk and busy lot, and there's nothing gets away from them.

Two big events of the past week which have been recorded in the "flickering photographs" are the breakings of ground for the mammoth stadium at Beechwood Canyon to be used for the 1916 Olympic games in May, showing Mayor Sebastian and other city officials in action, and the dedication of the Los Angeles Municipal Power Plant March 30.

Good Sport is May.

May Robson is going to prove her right to the title of the best handicap baseball fan in the world by helping to open the season at Washington for tomorrow.

Miss Robson will occupy a box and will root impartially for both Frank Chance and Ham Patterson.

It is understood that at home on her New Jersey farm, where her grandchildren visit her in summer, Miss Robson is handy both with ball and bat.

May Roll into "Legit."

Freddie Arbuckle, it is reported on good authority, is about to renew his not-expired contract with the Keystone. The round comedian has several big offers, not only in vaudeville and in pictures, but for the legitimate stage. He is the considered favorite motion picture company of his own.

Marrow.

Sadie Burt, at the Orpheum, has some of the very cutest high shoes in the country. They reach nearly to her knee.

"Our waist lines are going down, and our shoes are getting higher," said Miss Burt. "If the other doesn't stop, our waist lines will soon be below our shoe tops."

Truly Wise.

Truly Shattuck, who has been appearing in pictures, has been booked on the eastern circuit for the circuit of vaudeville. She will open at the Colonial in New York.

Frames Her Back.

Kitty Gordon, who appears at the Rialto today in "As in a Looking Glass," is said to wear more gowns to the square inch of film than any photoplayer in the business. That is, she frames her lovely back in more changes of costume than any other girl, and also brings a fine repertoire of hats.

Comedians to Rump 'Round.

The Majestic will hold its "surprise" night this evening at the Majestic, and Mack Sennett will be represented by some of his very funniest comedians.

Back from Antipodes.

Muriel Starr, who went to Australia three years ago, following her engagement at the Majestic, has returned to America after a very successful engagement in the Antipodes.

Barrie Writes New One.

Maude Adams is to have a new play, "A. J. Barrie," in which she appears next month. She will spend the coming summer in study of her new role.

Resurrection Note.

Even if it were your best friend who pointed out a man and told you that he made a world-wide prominence by being dead for thirty-two days, chances are you would call him a short and ugly word. So the P. A. says he hardly expects to be believed when he reads the obituary for K. M., who heads the Hippopotamus Bill this week. He wears on his sacred cause and chewing gum, however, that it's true, and while K. M. can't prove it by being dead for thirty-two days this week at the Hipp, he nevertheless does some wondrous things.

The Orpheum yesterday received some important advance bookings for the coming spring and summer season. Among the theatrical face cards who will grace the local vaudeville stages are Calve, the famous singer; Fritz Schaff, comic opera star; Eleanor de Cianero, prima donna of international fame; Ciccolino, tenor likewise noted; Ruth St. Denis, and her dancer; Eddie Foy, Jr., and Sophie and Billie Taylor; Alexander Carr, formerly of "Potash and Perlmutter"; Emma Carus, Fannie Brice, Marie Cahill and others.

Some notable one-act plays and other attractions will also be seen, including "Overtones," "The Forest Fire," "The Red Fox Trot" and "The River of Souls," a unique Chinese sketch.

Edition Will Speak.

Lillian Gish, silent star, is to have her long awaited and have a leading role in the forthcoming grandiose out-door spectacle, "Julius Caesar," which Raymond Wells is directing. She will play "Cleopatra." Miss Gish has confided to the writer on several occasions that she wished very much to be cast in some of the pictures, but probably did not dream of doing these roles on the stage for some time to come. She is naturally delighted with the opportunity, and no doubt will do the role full justice.

She has a wonderfully sweet and well-trained speaking voice, and all those who have seen her in pictures know how well she will satisfy the demand for beauty and dramatic ability in the role of Cleopatra.

Several other stars will be seen, including "Overtones," "The Forest

Fire," "The Red Fox Trot" and "The

River of Souls," a unique Chinese sketch.

to Consumption.New Impetus is Felt in Gold
Roads Section.

[SPECIAL CORRESPONDENCE]

OATMAN (Ariz.) April 1.—No less than ten properties in this district are now in that stage where highly interesting happenings are expected at any moment. The properties in view have their shafts down to an advantageous point or are cross-cutting to cut indicated ledges.

The Argos entered a change of formation from a latite to a rhyolite material, showing calcite and quartz carrying good values. The matter panned well. The company struck the new vein at 360 feet in the shaft. They will continue sinking to the 400 level and crosscut.

Another property that has entered an encouraging condition is the Gilt Edge. At a depth of 182 feet the operators ran into a strong flow of water. The fact that quartz stringers are also making their appearance is promising.

The Carter is attracting considerable attention. Since its birth they have turned their attention to sinking to the 500-foot level as the objective point. The plant was recently overhauled and a new gallows frame erected. The company on the 250-foot level has a good body of ore, obtaining fair values.

The main working shaft of the Tom Reed, Jr., is down 225 feet and some water had already been encountered. The company owns a large tract of ground located very close to the heart of the town. It has such neighbors as the Gold Dust, the Boundary Cone, the Lexington Arizona, the Tom Reed and Lucky Boy.

DEAL IS CLOSED.

One of the most important deals closed here was consummated during the week by the mining firm of Weber & Company. Through that agency the Mohave-Wonder group of claims, adjoining the Sunnyside, was taken over by the Goldfield Consolidated Mines. The Mohave-Wonder Mining Company was formed. Some time ago \$10,000 cash and a block of stock was offered for the claims, but were flatly refused.

The close of the deal for the taking of 200,000 shares of treasury stock of the Big Jim by eastern people for a consideration of \$250,000, is the talk of the town. It is by far the largest transaction effected by any one company in the Oatman field. The deal was closed for the company through the agency of H. E. Teter & Co. of Los Angeles. It was made in order to provide for the full equipment and for the full property of the Big Jim property. The location of the purchasing syndicate was not made public at this time.

The Big Jim is now crosscutting on the second level, the 455-foot mark. There are twenty feet of water.

The shaft on the Paramount, located in the Boundary Cone section, is down eighteen feet and at that shallow depth a stringer eight inches wide was cut, bearing values that averaged \$2 per ton.

On the property of the Oatman Half Moon, operated by Orville E. Jackson of Los Angeles, the water flow in the east shaft having receded, sinking of the main shaft is in progress. The work will be started at the 400 level.

The Oatman Belmont, another of the newer companies, has completed plans for road work. They are arranging for the sinking of a shaft and an ore processing machinery will shortly be placed, it is stated.

BOUNDARY CONE.

Crosscutting on the 700-foot level of the Boundary Cone has been started. With three shafts at work rapid progress is being made. This property looks up as a big producer.

On the 600-foot level an ore shoot 15 feet long was opened, carrying better than pay values.

Considerable activity is taking place in the Gold Road section. The Sundial company, controlled by prominent easterners, are pushing its operation; the Gold Road Bonanza, under new control, is developing its property and it is reported that new people have become interested in Gold Road. Capitalized that work on a large scale will shortly be started.

The Arizona Tom Reed is the scene of much activity. A new shaft is being sunk, a number of new buildings are being erected and a new road is being built. Carl F. Schmid of Los Angeles and F. Morris of Oatman are operating this property.

The Apex Pioneer, adjoining the Oatman Pioneer on the west has completed a geological map. Plans are under way for development of the property on an extensive scale. Mining men of Colorado are interested.

The Oatman Leader is completing grading at the collar of the shaft for mine which is expected here the coming week. Luminescent paint and for the erection of a number of camp buildings is on the ground and the contract for the carpenter work has been let.

The Oatman Leader is now on the 500-foot level and is seven and a half feet. Several stringers have already been encountered, carrying small values in gold.

[SPECIAL CORRESPONDENCE]

SEVEN TROUGHS (Ariz.) March 31.—The Arizona Consolidated Smelting Company is preparing to enlarge its plant from 250 to 600 tons a day capacity. The expense will be met from the sale of bonds already negotiated. The amount will be used to come from the company's own mines. The Blue Bell and DeSoto, though a large amount of custom business is offered from the many small copper properties now being operated in the eastern Bradshaws and around the Big Bug section.

Sweden Admired.

[Kansas City Journal:] It is gratifying to note that Sweden has the place to pay England back in kind. In retaliation for sending her mail Sweden has started the ship wood-pulp to the allies. England's supply of wood-pulp has heretofore come mainly from Swedish manufacturers.

RED METAL ATTRACTS.

Eastern Capitalists Negotiating for Afterthought Property—Stockholders Soon to Take Action on the Proposition—Zino Content Valuable.

[SPECIAL CORRESPONDENCE]

REDDING, March 30.—Eastern capitalists have opened negotiations for the purchase of the Afterthought copper mine at Ingot, twenty-five miles north of Redding, and a meeting of the stockholders will be held shortly to ratify the deal. The owning company is an Arizona corporation, numbering many Southern California and eastern people among its stockholders. The property has been extensively developed and is said to contain fully 8,000,000 tons of profitable ore.

The product carries high copper values together with a considerable amount of silver and some gold. The excess of zinc formerly caused much trouble but it is said this difficulty can now be eliminated by the use of flotation, turning the metal into a concentrate with a small smelter, which has been built.

It is understood the company plans to erect its own plant, unless unusually attractive arrangements are made for reduction of ore at the Buly Hill Smelting Company. Representative of the eastern capitalists state extensive operations will begin as soon as the sale is consummated.

METHOD WITH SUCCESS.

New Era of Promise Unfolds in Southern Nevada Camp—Core Drilling Attracts Interest on Silver Pick—Merger is After Continuation of Bonanza-Jumbo Channel.

[SPECIAL CORRESPONDENCE]

GOLDFIELD (Nev.) March 31.—The successful treatment at small cost of the low-grade refractory ore of the Goldfield district is an amazing fact, the solution of this long vexing problem having been brought about by the introduction of the flotation process, which is now in successful operation in the big mill of the Goldfield Consolidated Mining Company.

With the economic success of this process established, a new era of prosperity and prosperity for the district is promised and the business men are convinced that this success is destined to exert a vital influence upon the future of the camp and its surroundings.

Recent tests have been conducted here and are ready to treat ore upon a commercial scale. That of the Goldfield Consolidated is already in operation and has proved a complete success.

The Goldfield is a company which is promising and the bonanza property is being treated out in its different units and will be in full operation in a few weeks.

Of great interest also are the corollary operations that have just started on the Silver Pick property, adjoining on the west the Mohawk claims and on the east the Goldfield claims, both now known in this hemisphere.

Within a few hundred feet of stages that have produced millions from the Mohawk ore bodies, a drill is being sunk at a rapid rate of speed and will be sent in at least 1200 feet, producing a 5-1/2-inch core for

EFFECTS OF ADVANCE.

The advance in silver implies a material increase in profits for all local producers, several of whom have been carrying large stocks of the white metal, confident that there would be a reaction for the better.

OHIOAN KILLED AT OCEANSIDE.

Noted Financier of Advanced Years Loses Life.

Several Others Injured as Car Turns Turtle.

Eastern Educator Sees Good Prospects Here.

[LOCAL CORRESPONDENCE]

PASADENA, April 3.—Col. S. L. Mooney, 85-year-old millionaire, banker and railroad builder of Woodsfield, O., who, with Mrs. Mooney had been passing the winter at the Hotel Maryland, was killed yesterday afternoon in an automobile accident, caused when the machine, in which he and other members of his family were riding, turned turtle five miles south of Oceanside. Mrs. Mooney has a broken ankle but of the six occupants of the machine she was the only one not rendered unconscious.

In the party besides Col. Mooney and his wife, were their daughter, Miss Martha Mooney, of New York; Miss Bertine Tremaine and Burton Tremaine, son and daughter of the president of the Peerless Automobile Company of Cleveland, and a man by the name of Gammom.

According to Jack Kendall of Pasadena, who passed the scene of the accident, and who talked with persons who saw it, the car was traveling at the rate of about forty miles an hour when suddenly the right rear tire exploded and the car turned turtle and rolled over twice, landing on its side.

All the occupants were thrown from the machine. Col. Mooney lived an hour after the accident and died in a sanitarium consciousness. With the exception of his wife, the others received only minor injuries. They were all taken to the San Luis Rey Hotel at Oceanside, but will be brought to Pasadena today.

As soon as a telephone could be reached, Mrs. Martha Mooney telephoned the Hotel Maryland and Mr. Moore, assistant manager, hurried to Oceanside with Lewis H. Turner an undertaker, who took charge of the body. A man who wanted to go to Oceanside last night by Manager Linnard to accompany Mrs. Mooney back to Pasadena today. Besides having a broken ankle she is suffering from broken ribs and a fractured body.

Col. Mooney was one of the most prominent men accustomed to pass the winters here. He was president of the Monroe County National Bank of Woodsfield, was an owner and building contractor throughout the state and was a member of the late President McKinley's staff when the latter was Governor of Ohio. He was a man of great wealth, being rated as a millionaire several times over. He was the owner of a large coal mine.

His son, William Mooney of Marietta, O., is a Congressman. The family is one of the most prominent in the State and Col. Mooney has always been one of the best-known figures in the world.

Col. Mooney lost his first wife several years ago and two years ago married Miss Eols of Marietta, coming to Pasadena with her on their honeymoon. She at once became a great favorite, being considered by many as the most charming woman at the hotel.

The Mooneys went to San Diego and Coronado only last Friday and were to have returned here today. They were riding sightseeing yesterday and according to the daughter, the accident was so sudden that they had no idea how it really happened.

The news of Col. Mooney's death affected the Mooneys greatly, with whom he was much beloved.

EDUCATIONAL PROSPECT.

Mrs. Ella McClellan, dean of Vassar College for thirty years, who is in Pasadena, a guest at the Orton School for Girls, stated yesterday that she is much impressed with the possibilities in California for the development of a great institution of education for young women—a school that would be to the West what Vassar is to the East.

When California has such an institution of learning, Miss McClellan declared that it would be advantageous to send the eastern girls West and the western girls East. And a great school like Vassar would be doubly attractive to the eastern girls of the West who would rather send their daughters to school nearer home.

The freedom of your outdoor life appeals to me," said Miss McClellan, who is interested in Vassar. "More emphasis should be given to outdoor pursuits than at many colleges. Much physical work is required in the open and horseback riding, boating and other sports are enjoyed. These features most appeal to the school."

This is Miss McClellan's first visit to California and she is charmed. She has been visiting in San Diego, Riverside, Los Angeles and other places. She views the observatory on Mt. Wilson and is much interested in the astronomical equipment there.

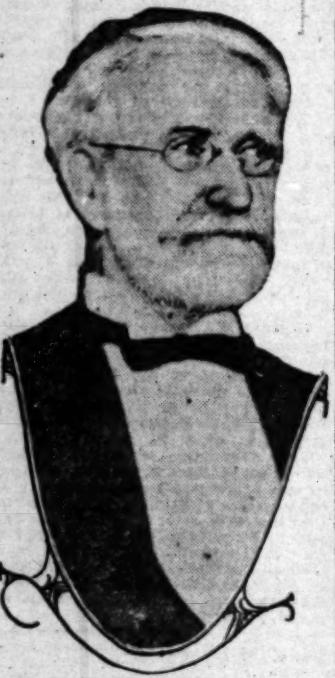

INTERESTING PARTY.

Mrs. William Seward Webb, daughter of William H. Vanderbilt and wife of Dr. Webb, a director of the New York Central Railroad, and a party of interested friends arrived at the Hotel Maryland, where they are occupying one of the largest rooms available. In the party are Louis Webb, brother-in-law of Mrs. Webb of New York and Mr. and Mrs. J. H. Purdy of Washington.

Mr. Webb refused to be interviewed, laughingly declaring that they were just a party of common people, uninteresting and doing nothing worth writing about. The entire party, however, declared that they are delighted with California and will probably remain here a week. They asked about the latest war news, explaining that it had caused them great grief inasmuch as so many of their friends are being killed. They will be here only a few days, going from here to San Francisco by motor and thence to New York before returning to New York.

[LOCAL CORRESPONDENCE]

AVALON, April 2.—The search still continues for the missing schooner Ruby, Capt. Harry Lynch of San Pedro which left San Francisco fifteen days ago and has not yet been reported. The crew is due at Catalina Harbor April 25 and 26 to be accounted for.

The revenue cutter McCullough put into this port at noon today and the craft had not yet been located.

A number of bannings in Avalon which are personally known to Capt. Lynch state that he was thoroughly familiar with the location of Catalina harbor and that it would be almost impossible for him to miss his destination.
